EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kenneth L. Sherman (Reg. No. 33,783) on September 27, 2007.

The application has been amended as follows:

Claim 11 line 1 should read: "The method of claim 2"

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the closest prior art made of record fails to teach or suggest the detection of a slanted edge in an image signal, detecting image pixels that belong to a luminance transition range of the slanted edge and determining a center pixel and a length of the luminance transition range, wherein the length of the luminance transition range is along a direction within 45 degrees from the edge direction. Therefore, these limitations in combination with the generation of gain suppression factors for the detected pixels and the execution of detail enhancement for the pixels based on the gain suppression factors are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
